Newly R-fitted and Furnished Throughout.

FIRST-CLASS DINING ROOM RATES REASONABLE.  
DRUMMERS' SAMPLE ROOMS.

### ARIZONA HEADS THE LIST.

State Fair the Greatest and Most Successful.

Although Maricopa county made the largest display of farm products at the State fair and was awarded first prize for county exhibits, that is nothing to the discredit of the other counties of the State. All the counties had fine exhibits, Yavapai winning second prize and Yuma third.

Pinal county had a splendid exhibit of cotton, corn, wheat, oats, vegetables and fruit. The exhibit was not a large one and was hastily gotten together, and therefore really did not do justice to this county, which undoubtedly will have a much better exhibit more attractively displayed another year. However, a number of firsts and seconds were won on individual specimens of products shown.

According to Prof. McOmie of the University experimental station, who had charge of the agricultural and horticultural exhibits the fair, as far as these two departments could make it, was the best of the nine held in the State. Every county had a rival and the exhibits brought in from them were the best and finest specimens of farm products that Arizona could produce.

The floral exhibit from the gardens of the city was one of the prettiest ever seen at a fair. It showed what wonderful blossoms could be raised in a dry climate, and the flowers in point of size and variety excelled those raised in California, the boasted home of the roses and palms.

The fruit exhibit was one to open the eyes of the most skeptical. There the blue predominated, for all the fruit shown in the exhibit was of the best and had a claim on the blue ribbons. In the fruit exhibit were peaches, pears, apples, grapefruit, lemons, pomegranates and every other variety of fruit raised in the Salt River valley. The biggest display of Arizona fruit came from Maricopa county and most of it was raised right around Phoenix. Yavapai county also made a fine showing on fruits, vegetables and other farm products and carried off a quantity of blue ribbons. The display from this county was unique, the interior being built of logs, and the fruits and other products attractively arranged in steps.

Next in importance came the grain corn, alfalfa, hay and other numerous exhibits. Most of this also came from Maricopa county. Yuma, Pima, Pinal, Graham and the other counties of the State were also given many prizes on their farm products.

The mineral building had its share of visitors along with the agricultural department. The exhibits in this building came from the mining counties and was a wonderful one. Every kind of ore and mineral found in Arizona was exhibited.

The poultry exhibit was a big feature of the fair and contained over 1500 birds. The quarters were too crowded for the best display, but nevertheless was a creditable showing, in which many fine specimens of poultry were to be seen.

The kennel exhibit was considered by the dog lovers to be the best thing at the fair and never has there been such a collection of fine dogs shown at a fair as were exhibited at this one. Dog fanciers from all over the State were there and offering their pets and prize winners for show.

The live stock exhibit gave the plum to Arizona as the best stock raising State in the Union. This was proved beyond any doubt when the stock parade passed in review before the grandstand. The finest horses and cattle to be found in Arizona were there.

One of the principal exhibits was found near the entrance in the first building to the right. It was a wonderful exhibit of dairy products and was made by one of the Phoenix creameries.

All kinds of cheese, butter and dairy products were shown, together with an exhibition of electrical churners and other dairy apparatus of the very latest models. All of the local dairies including the Hassayampa, Maricopa and Farmers' Co operative had splendid exhibits of their products.

The woman's building proved a central attraction. The women in charge of the various exhibits are enthusiastic over the great success that every one pronounced the department to be. The exhibits in this building were attractively arranged and varied. Beginning with the art exhibit and going through to that of fine needlework, laces, embroideries, cooked foods and other samples of handiwork of the women of the State, there cannot be found one flaw. Everything was perfect and those in charge declare it to be the best exhibit yet shown at an Arizona State fair.

In the educational department an unusual amount of interest was shown. This was a splendid exhibit of work from nearly every school in the State. The Phoenix public school had an exceptionally fine exhibit and from the Indian school the pupils have shown what the Indians can do not only in a mechanical way, but in writing, drawing and water colors as well as in domestic science.

From the kindergarten up the pupils' work was exhibited. In the Mesa, Tempe and Normal schools the work was exceptional. While very much like the exhibits at former fairs, this exhibit seems to show finer work and there was a great deal more of it.

The Pima and Graham county schools also had a fine exhibit, consisting of specimens of writing, domestic science work, art and weaving. The Indians from the Pima county Indian schools also showed some splendid work.

The training departments in the Tempe public and normal schools had good exhibits in all lines of school work.—Arizona Blade-Tribune.

### Mexican Leaves Large Estate.

A letter received yesterday by Mervin Moore, at Douglas brought the intelligence that Don Ignacio Elias, aged 55, a wealthy and popular resident of Arizpe, passed away at his home in that town last Sunday. The funeral occurred Monday. The nature of his complaint was not stated in letter.

Don Ygnacio, as he was best known was a friend of Americans under any and all circumstances and many "gringos" have reason to remember his unflinching courtesy and generosity.

He leaves an estate estimated at more than a half million dollars, consisting in ranches, farm, mercantile ventures and mining property, located for the most part in the Arizpe district.

He is survived by a family of ten children and his wife. He is understood to be distantly related to the Elias family at present residing in Douglas.—Prospector.

### Arizona Leads.

Nothing succeeds like success. Again Arizona leads the United States in the percentage of crop prospects. The great record of September, when Arizona headed all states with 114.3 as the general condition of all crops, is exceeded by the October report just to hand. This report gives the lead to Arizona again with a percentage of 116.4. This speaks well of the agricultural methods in the new state.

There is much to be gained from a perusal of the reports issued by the Department of agriculture, and a study of the data supplied has again evidenced the superiority of irrigated agriculture. The success of irrigation is assured and with the encouragement which all thinking minds are giving to storage problems and pumping methods, a new day in agriculture in Arizona is quickly dawning.

### Seventeen Young Lawyers Admitted.

William J. Bryan, Jr., has returned from Phoenix where he has just received his certificate admitting him to the bar, and entitling him to practice before the state supreme court, all other state courts and before the federal district courts.

Mr. Bryan passed a most creditable examination and is receiving the congratulations of his many Tucson and Arizona friends upon his success. Mr. Bryan stated that he would practice law in Tucson at the office of Frank Hereford.

In all there were seventeen candidates who successfully passed the legal examination last week and who were given certificates. Besides Mr. Bryan, Tucson is credited with another new lawyer, John D. Mackay. The others included: Fred H. Eckert, Allen Hill, Neil C. Clark, Prescott; Samuel H. Francis, Bisbee; Walter A. Wilson, Clarence E. Johns, Ira Louis Quiet, Frank Delany, Phoenix; Frederick Louis Zimmerman, Arthur E. Price, Chandler; Charles C. Jones, Flagstaff; Hugh M. Foster, Miami; Dove W. Ling, Clifton; Malcom C. Little, Nogales.—Tucson Star.

### Denver Parties Lease Mine.

A syndicate of Denver capitalists has leased the big mining property of the Gold Mining & Milling Co., located about three miles from Cochise station and big development work has already been started. It is reported that the lease calls for extensive development work, and at the end of two years the lessees are to have a \$45,000 mill on the property. Manager Hubbard of the Denver Company, it is reported, is already negotiating for the plant.

This is one of the biggest mines in the country, and over two million tons of ore, which will average better than \$4 per ton, has been blocked out. The new plant will average better than 100 and 150 tons ore per day. It is estimated that there is enough ore to keep the big mill going for years and years. The owners of the mine were offered \$150,000 for their property four years ago.—Benson Signal.

### Cost and Figures on State Fair.

Between \$68,000 and \$70,000 was the cost of the ninth Arizona fair.

The paid admission totaled about \$30,000 as against \$22,000 last year.

Complete figures on the cost of the fair, the admission and the receipts from all other sources will be available in a few days. They are being prepared by Secretary C. B. Wood and the members of the commission.

From the state the fair received \$25,000. Between \$4000 and \$5000 was received for concessions the increase being nearly \$2000 over last year. Entrance fees and other revenues will bring the total up to more than the fair cost.

Included in the estimate of \$68,000 to 70,000 is the cost of various improvements. Another important item in the cost of the fair is the purses, which totaled \$29,100.

"The fair grew at an astonishing rate," Commissioner J. J. Keegan said. "We simply must have more ground, and we must have it by next year if possible. If we do not have it and also more space in the exhibit building, I do not know what we are going to do. This year we had to increase our stall space fifty per cent."

A Missouri editor soliloquizes: "Backward, turn backward, oh time in your flight; give us a girl whose skirts are not tight; give us a girl whose charms, many or few, are not exposed by too much peek-a-boo; give us a girl, no matter what age, who won't use the street as a vaudeville stage; give us a girl not too sharply in view; dress her in skirts the sun can't shine through."

### BEAUTIFUL MODJESKA PARK.

Golden Opportunity to Buy a Lot in Ideal Spot on Easy Terms.

Just as the beautiful Modjeska was "Queen of the Stage," so is this stately tract, Modjeska Park, "Queen of the Suburbs." Designed for beauty as well as practicability, Modjeska Park is sought by the modern home-builder as well as the investor. Its beautiful rose and carnation circles give it a rare landscape beauty. Added to this are its stately mission entrances which impart an air of elegant exclusiveness. The design of the entire tract is a triumph of modern engineering.

The tract is situated in one of the most fruitful garden-spots around Los Angeles. The improvements are of the highest character, including cement curbs and sidewalks on most of the property.

A magnificent roadway of 120 feet in width passes through the center of this beautiful park, and within the limits of the townsite 15 feet of this magnificent boulevard are reserved for flowers and park purposes, leaving a driveway of about 50 feet on either side.

At street intersections, at regular intervals, floral circles have been put in and named after native flowers, each circle named after the flower with which it is planted. The avenues running east and west are named after forest trees and the streets running north and south after fruit trees.

Modjeska Park is in the famous Crystal Springs artesian belt. Flowing wells are secured at 80 feet.

Beautiful Modjeska Park adjoining the lively city of Watts, which latter city lies a little south of the limits of Los Angeles, only a few years ago a small village, but today a thriving city of over 4000 inhabitants, banks, public schools and a beautiful high school, lies directly between Los Angeles and (San Pedro) Los Angeles harbor. There are four electric car lines between Watts and Los Angeles, and practically the junction of six different electric car lines.

Modjeska Park is level, nicely laid out and contains cement walks and curbs. The Pacific Electric Railway passes directly through the property, the running time from Los Angeles being about twenty minutes. The Long Beach Boulevard passes very close to the Park. This boulevard is one of a chain now being constructed through Los Angeles City and County. Modjeska Park is designed for a home place. The soil is very productive and especially suitable for gardening.

Remember, Modjeska Park lies between Los Angeles and her harbor, and make no mistake, as with all cities, they grow to their harbor, which will be the case of Los Angeles by 1920, when that city will have a population of over 1,000,000.

Lots in this beautiful tract are selling from \$300 to \$500; \$100 down, \$10.00 monthly. No interest or taxes until paid for and by the time you have them paid for will sell for double the amount you gave for them.

See photo of tract in the show window of George B. Marsh, Inc. adv.

The ladies of the Crittenden Home were surprised yesterday to find out from Mrs. Messenger, superintendent of the home, that the booth that was conducted at the fair for the home, at which lunches and dinners were served during fair week, had netted close to \$1000 which can now be used for the activities of the institution.—Arizona Republican.

For a state possessing no seaboard, Arizona has a wider range of altitude than may be generally supposed. The highest point is San Francisco Peak, 12,611 feet above the sea, and the lowest point is on Colorado river at Yuma, where the elevation is but 100 feet.—Prescott Courier.
